

Project Director

Approved For Release 2001/09/07 : CIA-RDP33-02415A000200350039-8

4/14/61

FOIAb3b

1. your memorandum most clearly presents the meteorological instrument technician's function and organizational tie-in.
2. I understand from [redacted] that NACA is so short of personnel that they already feel the loss of [redacted] assignment to our project. Such being the case, I believe we may have to turn to AWS or some other source for getting a full time technician for each detachment.
3. Possibly we should consult AWS on the availability of such a technician or have some 3, of their weather airmen trained on the maintenance of the equipment by [redacted] and other equipment manufacturers.
